PROFESSIONAL PROFILE

Sixth-semester Informatics student at Universitas Gunadarma with approximately three years of hands-on experience supporting inventory control, financial administration, and daily operations in a family-owned business. Developed a web-based POS sales validation and payment reconciliation application using Python, FastAPI, OCR, and a relational database. Combines technical problem-solving with practical exposure to sales, stock, cash, and operational data. Comfortable operating across cross-functional business areas — sales, retail operations, and product — with a fast learning curve and a builder's mindset.

PROFESSIONAL EXPERIENCE

Operations and Financial Administration Assistant 2023 - Present
Family-Owned Business | Tangerang Selatan

- Maintained inventory records and monitored incoming and outgoing stock to support accurate stock control.
- Recorded daily sales, cash movements, and supporting financial data in organized operational records.
- Prepared sales, inventory, and financial recaps using Microsoft Excel for routine business monitoring.
- Reconciled sales, payment, cash, and stock records to identify discrepancies and support corrective action.
- Organized business documentation and supported day-to-day administrative and operational activities.

SELECTED PROJECT

Sales Validator — POS Audit & Reconciliation Web Application [GitHub Repository](#)

- Designed and developed a web application to validate Point of Sale reports and reconcile cash, debit, transfer, and receivable transactions.
- Integrated Optical Character Recognition to extract transaction information from uploaded bank-mutation images and supporting payment documents.
- Implemented saved validation results, receivable tracking, and manual or OCR-based payment reconciliation workflows.
- Built the backend with Python, FastAPI, SQLAlchemy, and a relational database, supported by JavaScript, HTML, and CSS on the frontend.
- Documented the project, managed source code with Git and GitHub, and deployed the application for web-based access.

EDUCATION

Bachelor of Informatics 2023 - Expected 2027
Universitas Gunadarma | Current Semester: 6

Academic focus: software development, data analysis, databases, machine learning, and business-process automation.

CAREER INTERESTS

Retail Operations • Sales Analytics • Product Operations • Product Management • Business Process Automation

CORE COMPETENCIES

BUSINESS & DATA

Data Analysis, Inventory & Stock Control, Financial Administration, Sales & Payment Reconciliation, Data Cleaning, Operational Reporting, Content Strategy & Personal Branding

TOOLS
